OBJECTIVE

Full-Stack Developer with expertise in React, JavaScript, Node.js, and Django, dedicated to building scalable and user-centric web applications. Passionate about continuous learning and delivering high-quality solutions.

TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS

Backend: Django, Node.js, Express.js

Database: MySQL, PostgreSQL, MongoDB, SQLite

Language: JavaScript, Python

Tools : Git, GitHub, Vercel, Railway, Render

EXPERIENCE

Social Teck

13/10/2025 - 20/12/2025

Python Full-Stack Developer (Intern)

- Worked as a Full-Stack Developer Intern contributing to the design, development, and deployment of web-based applications for real-world use cases.
- Built responsive and interactive user interfaces using HTML, CSS, Bootstrap, JavaScript, and React, ensuring cross-device compatibility and smooth user experience.
- Developed backend functionalities using Django, including API integration, business logic implementation, and secure user authentication with role-based access control.
- Collaborated closely with a Data Science team to integrate datasets and analytical outputs into dashboards, enabling meaningful data visualization and insights.
- Designed and managed relational databases using PostgreSQL and MySQL, optimizing schemas for performance, scalability, and data integrity.
- Implemented version control workflows using Git and GitHub, following best practices such as branching, pull requests, and code reviews in a team environment.
- Deployed full-stack applications on Vercel and Railway, handling environment variables, build processes, and production-ready configurations.
- Gained hands-on experience in end-to-end project workflows, including requirement analysis, development, testing, debugging, deployment, and documentation.

CERTIFICATION

Social Tek: Python Full-Stack Developer

PROJECTS

1. Student Participation Dashboard - [\(LINK\)](#)

- Built a responsive web dashboard using HTML, CSS, Bootstrap, and JavaScript to manage student participation data for school and college events.
- Centralized event and student activity data on a single platform, eliminating dependency on Power BI and enabling direct access via the web.
- Collaborated with the Data Science team to integrate datasets and visualize participation insights in a user-friendly format.
- Designed a dynamic, mobile-friendly UI optimized for real-time participation tracking across multiple devices.
- Version-controlled the project using GitHub, ensuring clean code management, collaboration, and continuous updates.
- Deployed the dashboard on Vercel, enabling fast, secure, and scalable access with automatic builds and live previews.

2. Manufacturing Management System – [\(LINK\)](#)

- Developed a full-stack manufacturing quality monitoring web application using Django, enabling real-time machine status and defect tracking.

- Implemented a two-stage prediction workflow integrated into the backend, triggering defect analysis only when machine health checks fail.
- Designed and built responsive, user-friendly forms and dashboards with validation, tooltips, and dynamic result views for operators and engineers.
- Created and optimized PostgreSQL database models to manage machine parameters, prediction logs, users, and transactions efficiently.
- Implemented secure authentication and role-based access control using Django for Admin, Engineer, and Operator roles.
- Integrated payment gateway functionality for order processing and transaction management within the system.
- Used GitHub for version control and team collaboration, following best practices such as branching, pull requests, and code reviews.
- Deployed the application using PostgreSQL on Railway, secure environment variables, and production-ready backend configurations.
