OBJECTIVE

Full Stack Developer with hands-on experience in building scalable web applications using React.js, Node.js, and Django. Skilled in developing REST APIs, implementing authentication systems, and deploying applications on cloud platforms like Vercel and Railway. Strong experience in database design, API integration, and end-to-end project development.

TECHNICAL SKILLS

Languages	: JavaScript, Python
Frontend	: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend	: Node.js, Express.js, Django
Databases	: PostgreSQL, MySQL, MongoDB, SQLite
Tools	: Git, GitHub, Vercel, Railway, Render
Concepts	: REST APIs, Authentication, CRUD Operations, MVC Architecture

EXPERIENCE

Social Teck	13/10/2025 - 20/12/2025
-------------	-------------------------

Python Full-Stack Developer

- Developed and deployed full-stack web applications, contributing across the complete software development lifecycle including requirement analysis, design, development, testing, and deployment.
- Built responsive, high-performance user interfaces using **HTML, CSS, Bootstrap, JavaScript, and React**, ensuring cross-browser compatibility and seamless user experience across devices.
- Designed and implemented backend services using **Django and FastAPI**, developing RESTful APIs and handling business logic efficiently.
- Implemented secure authentication and authorization mechanisms using **JWT (JSON Web Tokens)** and **role-based access control (RBAC)** for scalable user management.
- Integrated both **relational (PostgreSQL, MySQL)** and **NoSQL (MongoDB)** databases, optimizing schema design for performance, scalability, and data integrity.
- Collaborated with Data Science teams to integrate datasets and analytical models into dynamic dashboards, enabling real-time data visualization and insights.
- Managed version control using **Git and GitHub**, following industry best practices including branching strategies, pull requests, and code reviews in an Agile environment.
- Deployed and maintained applications on **Vercel and Railway**, configuring environment variables, CI/CD workflows, and production-ready builds.
- Improved application performance and reliability through debugging, testing, and code optimization techniques.

CERTIFICATION

Social Tek: Python Full-Stack Developer

PROJECTS

1. Student Participation Dashboard - [\(LINK\)](#)

- Built a responsive web dashboard using HTML, CSS, Bootstrap, and JavaScript to manage student participation data for school and college events.
- Centralized event and student activity data on a single platform, eliminating dependency on Power BI and enabling direct access via the web.
- Collaborated with the Data Science team to integrate datasets and visualize participation insights in a user-friendly format.
- Designed a dynamic, mobile-friendly UI optimized for real-time participation tracking across multiple devices.
- Version-controlled the project using GitHub, ensuring clean code management, collaboration, and continuous updates.
- Deployed the dashboard on Vercel, enabling fast, secure, and scalable access with automatic builds and live previews.

2. **Manufacturing Quality Monitoring System**– [\(LINK\)](#)

Technologies: Django, PostgreSQL, JavaScript, HTML, Bootstrap, Git, Railway

- Developed a full-stack **manufacturing quality monitoring web application** using **Django**, enabling real-time machine status tracking and defect detection.
- Engineered a **two-stage predictive workflow**, triggering defect analysis only when machine health thresholds fail, improving system efficiency and reducing unnecessary computations.
- Designed and implemented **responsive UI components and dashboards** using HTML, CSS, and JavaScript, enhancing usability with form validation, tooltips, and dynamic result visualization.
- Modeled and optimized **PostgreSQL database schemas** to efficiently manage machine parameters, prediction logs, user data, and transaction records.
- Implemented **secure authentication and role-based access control (RBAC)** in Django, supporting multiple user roles (Admin, Engineer, Operator) with controlled permissions.
- Integrated **payment gateway functionality** for order processing and transaction management within the application.
- Utilized **Git and GitHub** for version control, applying best practices such as branching strategies, pull requests, and peer code reviews in a collaborative environment.
- Deployed the application on **Railway** with **PostgreSQL**, configuring environment variables and ensuring production-ready backend setup.
